

SKILLFORGE

SEO Basics & Keyword Research

Project 2 — Digital Marketing Industrial Training

DecodeLabs | Batch: 2026

Prepared by: Vansh Singhal | BBA, DDUMC College | June 2026

Brand: SkillForge	Keywords: 20 Verified	KGR Target: <0.25
-------------------	-----------------------	-------------------

1. Project Overview

Project 2 is the visibility phase: SEO Basics & Keyword Research. This track isn't about 'guessing what people like' — it's about Search Intent. Before you rank on page 1 of Google, you must master identifying the specific terms your audience uses and understanding the 'why' behind their search.

The Strategic Shift

Project 1 — Social Media	Project 2 — SEO
Push Strategy / Outbound Dynamics	Pull Strategy / Inbound Mechanics
Goal: Disruption	Goal: Capturing Intent

Requirements Met

- ■ Find 20 relevant keywords — DONE
- ■ Identify search intent for each — DONE
- ■ Suggest keywords for content — DONE
- ■ KGR score calculated (all < 0.25) — DONE
- ■ On-page SEO beacons placed — DONE

2. SEO Basics — The IPO Logic Model

SEO = Synchronize your content with what users are already searching. The Logic Skeleton: User Query (INPUT) → Algorithm: Relevance + Authority (PROCESS) → The SERP (OUTPUT). Synchronize Input with Content to control Output.

Long-Tail Strategy — Specificity is Power

91% of all web searches are Long-Tail. Broad terms have HIGH competition and LOW conversion. Long-tail specific queries have LOW competition and HIGH conversion.

Type	Example	Competition	Conversion
Head (Broad)	Internship	Very High	Very Low
Long-Tail	Remote Data Science Internship B.Tech 2026	Low	High

Competitor Gap — David vs. Goliath

	Internshala (Goliath)	SkillForge (David)
Monthly Visits	4.93M	Niche focus
Strategy	Broad Terms / Generalist	Specific Technical Terms
Approach	Mass market	Deep Content / Low KGR

We win by targeting the gaps, not the masses.

3. The 4 Archetypes of Search Intent

Intent	Description	Example	Content Type
Informational	Seeking knowledge	"What is machine learning?"	Blog Article
Navigational	Looking for specific page	"DecodeLabs login"	Home/Login Page
Commercial	Comparing options	"Best Python Course 2026"	Comparison Page
Transactional	Ready to act (HIGHEST VALUE)	"Apply data science internship"	Landing Page

4. KGR — The Math of Least Resistance

KGR = allintitle: results ÷ monthly search volume. Use Google: allintitle:'your keyword' to get the numerator.

KGR Range	Rating	Expected Result
< 0.25	GREAT	Rank in days
0.25 – 1.00	MODERATE	Can rank with effort
> 1.00	BAD	Too competitive, avoid

5-Step Execution Workflow

- 1. BRAINSTORM — Seed Keywords
- 2. EXPAND — Autocomplete / Variations
- 3. VALIDATE — Check Volume via Keyword Planner
- 4. CALCULATE — $KGR < 0.25$
- 5. CATEGORIZE — Assign Intent

5. 20 Verified Keywords

All 20 keywords have KGR < 0.25 — qualifying for the 'rank in days' category. Long-tail, high-intent, low-competition.

#	Keyword	Intent	Volume	Allintitle	KGR
1	remote data science internship for freshers India	Trans	1,200	280	0.23
2	python vs java for backend development 2026	Comm	900	190	0.21

2 0	apply online internship data science AICTE 2026	Trans	920	220	0.24

6. On-Page SEO — Placing the Beacons

Three on-page elements carry the highest SEO weight. Place your primary keyword in all three. Together they form the 'beacon' Google uses to index your page.

Element	Example	Why It Matters
Title Tag (Highest Weight)	Remote Data Science Internship 2026 SkillForge	Primary ranking signal
URL Slug	skillforge.in/data-science-internship	Clean, keyword-rich URL
Meta Description	Apply for best remote data science internship for B.Tech/BCA. Learn Python, SQL...	Drives CTR (not a ranking signal)

The Gatekeeper Rule: We do not spend money on Ads until YOU verify the demand. This verified SEO data is the key that unlocks Project 3: Paid Ads.

Conclusion

The absolute best way to master Digital Marketing is through hands-on practice. This keyword research plan for SkillForge demonstrates a data-driven content strategy built on search intent logic, KGR analysis, and long-tail targeting. By verifying demand before spending on ads, SkillForge can build a sustainable organic traffic engine.
